WORK EXPERIENCE

<Mercury Studio >

JUNIOR | UNITY & COCOS DEVELOPER | 06/2023 - PRESENT

Working across both Unity and Cocos, contributing to gameplay systems, feature development, and core functionality. Involved in implementing mechanics, optimizing performance, and integrating cross-module systems within the project architecture.

- Engines & Tech: Unity (C#), Cocos Creator (TypeScript / JavaScript)
- Responsibilities: Gameplay programming, system logic, feature implementation
- Indie Game Project: Core development team member, contributing to architecture, mechanics, and production workflow

<Unicloud Group >

INTERN - FRESHER | UNITY DEVELOPER | 10/2022 - 04/2023

As a Unity Developer at Unicloud Group, my primary responsibility was to develop immersive and engaging games using Unity Engine. My experience at Unicloud Group has enabled me to develop my skills in 3D game and VR Game development. I am proud to be a member of the team.

- My Role: VR Developer.

PERSONAL PROJECT

<Rambo Infinity>

PERSONAL PROJECT | 2D

github.com/thaithinhfzc/RamboInfinity-old

A simple 2D Side-scrolling shooter using Unity Game Engine. My first project with Unity engine from pre-made game assets

- Engine: Unity 2D.
